

THE EXCITING NEW FLEXIBLE ORDERING SYSTEM FOR THE HOSPITALITY INDUSTRY

STREAMLINE YOUR RESTAURANT

Increase your table turnover up to 30%

With everything available on their mobile phone, customers have exactly what they need to order and pay quickly and easily; thus encouraging more orders and therefore more turnover.

Save staff and customers' time by 40%

Our customers are reporting a time-saving of up to 40% in the taking and processing of dine-in-orders.

Reduce labour costs

Thanks to these time-saving measures, you can reduce overheads or dedicate more time to deliver excellent customer service.

Increase revenue by 50% with better communications

Many venues have reported revenue growth of up to 50% thanks to frequent customer contact via the Ordery SMS and email platform.

COVID-19 **PEACE OF MIND**

Ordering safely and securely with Ordery.

- Customers can avoid touching menus or PDQ machines which many others have been in contact with.
- Customers do not have to interact with staff unless they want to, and servers do not have to worry about awkward social distancing whilst helping customers.
- Customers can speed up their dining experience if they wish.
- Restaurants can increase table turnover, making up for reduced capacity.

EASY SETUP - BE UP AND RUNNING IN AS LITTLE AS HALF AN HOUR

SIGN UP

Customers are instantly up and running on our system when they sign up with a demo account.

BUILD YOUR MENU

With our easy-to-use menu builder, enter the dishes and categories which apply to your menu and they will appear on your public menu page.

CHOOSE YOUR PAYMENT METHOD

Select if you want customers to be able to pay via the app or via your current payment solution.

CUSTOMERS START ORDERING

Customers can find your restaurant by searching for you in the Ordery app homepage, or you can give them your unique url .

HOW DOES IT WORK?

QR Code / Online Web Order

You are assigned a unique QR code and web link. You can print this on your literature and place it on customer tables. Customers scan the QR code and are directed to your app's online menu.

Order and Pay

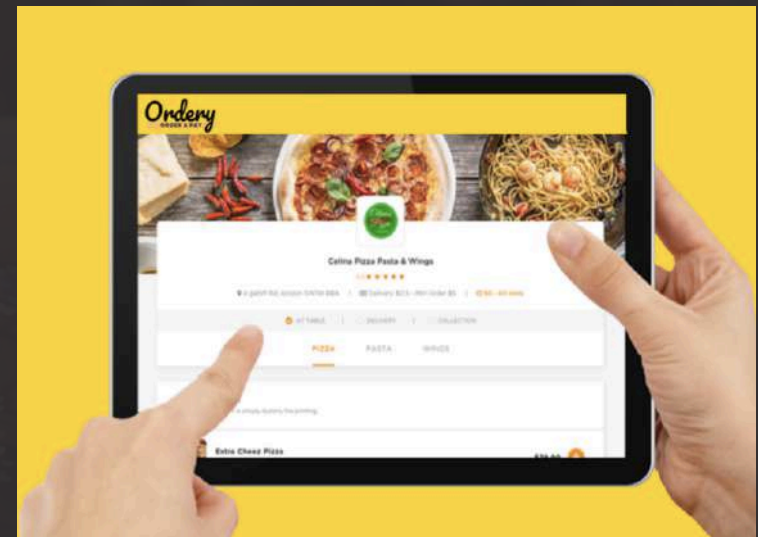

Customers order and pay via your app. The monies are transferred to your bank account by one of the world's leading payment providers. This is easily setup in our vendor dashboard. You can also take payment later outside of the app.

Receive and Serve Order

You will receive the order notification to your vendor login, which you can have open on a tablet or PC.

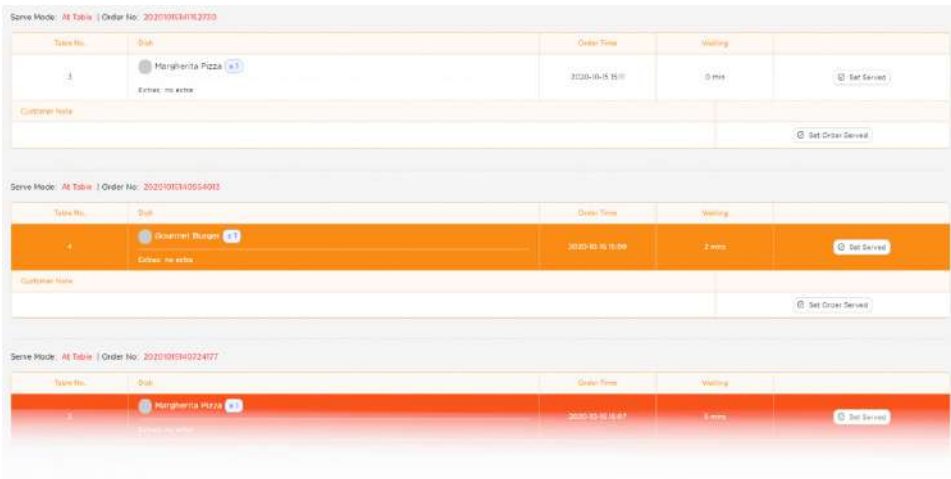

NO SPECIAL EQUIPMENT REQUIRED

Use our solution with any PC, laptop, tablet or mobile phone.

KITCHEN VIEW

- New orders appear on the list for staff to tick off as they are prepared or served.
- Easily see how long customers have been waiting.
- Colour-coded waiting times.
- Wetherspoons, McDonalds and other big brands use a Kitchen view like ours to manage orders effectively.

AUTOPRINTING

Automatically receive orders to a thermal printer as soon as a customer orders. You can also set drinks orders to print to one area and food to another area without even touching a PC or tablet.

EMAIL AND TEXT YOUR CUSTOMERS

Successful businesses have long understood the value of their customer database. Ordery's email and SMS marketing feature will help you to connect with every customer who has dined with you - so you can develop excellent loyalty and repeat business.

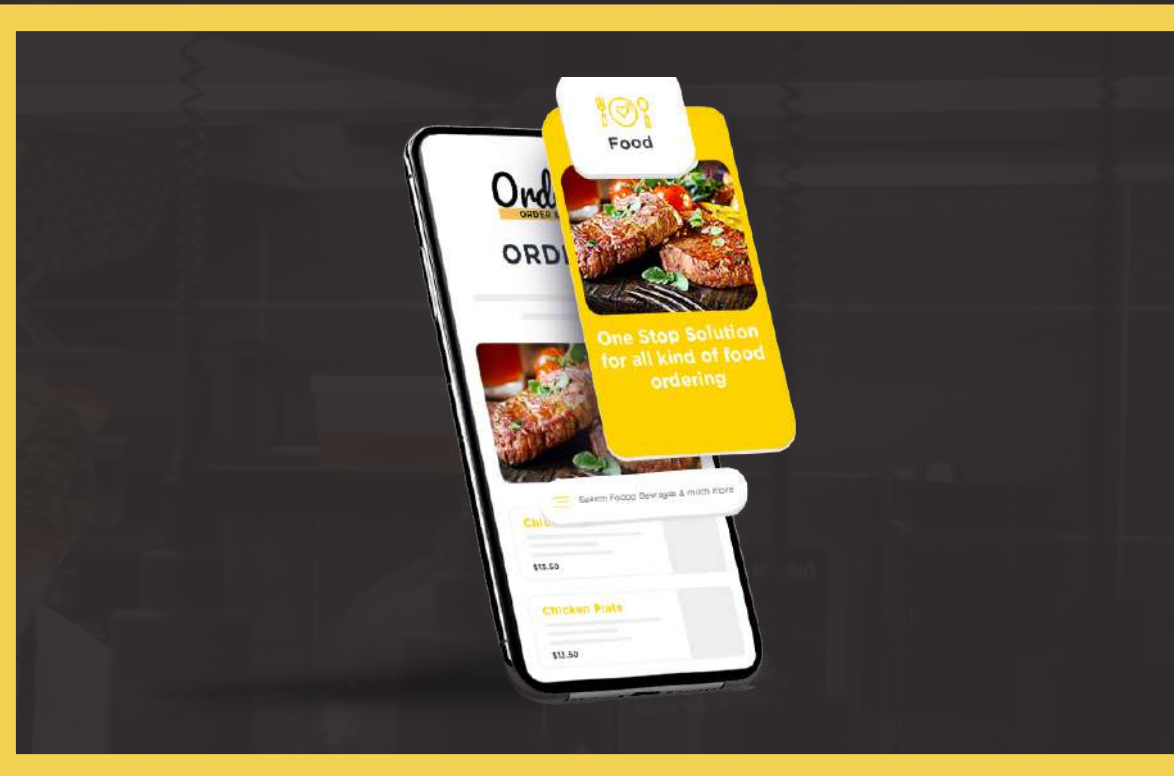

Keep customers up to date with what's happening in your business by sending regular e-newsletters to the database. You can add images, links, surveys and special offers that will increase your revenue at specific times.

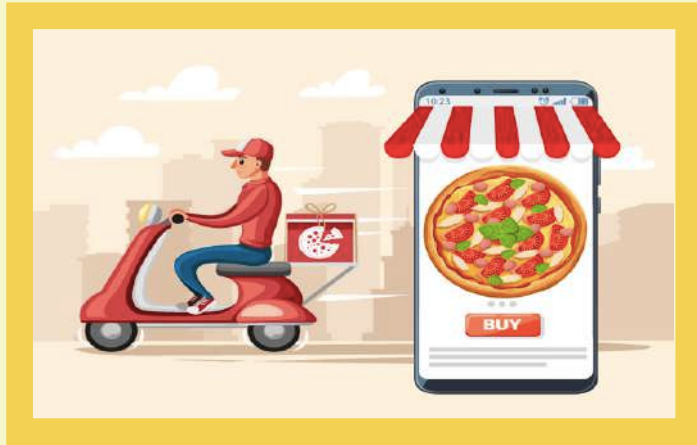

Texting your customers is the perfect way to promote special and time-sensitive offers. You can also send automated messages to update them on their order progress.

Home Delivery and Click and Collect

This online food ordering app will develop and grow your own Home Delivery and Click and Collect service.

What is more, our software could save you thousands of pounds compared to many like-for-like platforms:

Orders Per Week	Average Order Value	Saving Per Month	Saving Per Year
100	25	£1,405	£16,860
200	25	£2,810	£33,720
300	25	£4,215	£50,580

Increase turnover with Order at Table

Whether your customers are sat at their table, in the beer garden, or even in the queue coming in, they can browse your menu and place their order straight away.

This helps to reduce wait times, stops customers waiting for the bill, increases table turnover and improves customer satisfaction.

SPECIAL FEATURES

DASHBOARD

Your vendor dashboard gives minute-by-minute stats for your food and beverage business. View total orders, average order values, new orders waiting, total takings, top dishes for the day and many more invaluable analytics.

LOW COST

The app will allow you to build your own customer database and Home Delivery or Click and Collect business without paying the extortionate fees that other apps charge.

RETURNING CUSTOMERS

Automatically identify and highlight returning customers to give them that special valued customer experience.

CUSTOMER FUNCTIONALITY

Customers can Order at Home or Order at Table, view their order history and update their contact preferences.

PAYMENT INTEGRATION

Customers can pay via the app or by using your existing payment methods. In-app payments are handled by one of the world's leading payment providers - stripe.com.

FINANCIAL REPORTING

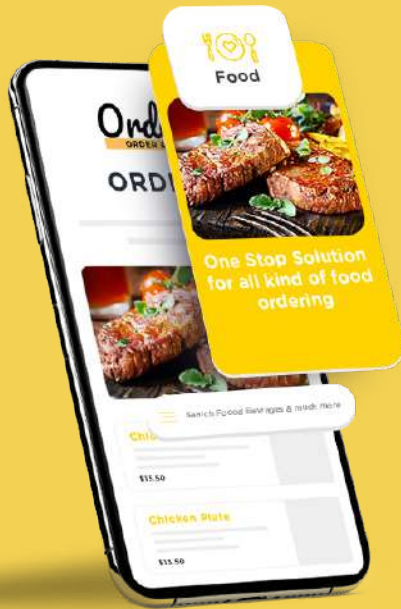

Run essential financial reports to instantly see takings, popular dishes, VAT liabilities and more.

MULTIPLE SITES

Easily deploy Ordery across your multiple sites for cohesive systems and reporting.
